National and Regional Analysis - : The Soviet Union

Description: This function involves production of economic intelligence on the over-all economic posture of the Soviet Union, including allocation of resources, economic growth, price structure, government budgets, national accounts, economic organization, economic plans and planning mechanisms, and Soviet capabilities to achieve economic goals. This function involves the aggregation of intelligence produced by most of the other components of the Office and presents over-all analyses of the economic situation in these areas. This intelligence is used in the production of National Intelligence Estimates, MI Sections, and current intelligence reports and, being of broad interest, serves a great variety of consumers including Congressional committees, the President's Council of Economic Advisors, [REDACTED] and the President's Business Advisory Council. It is also used extensively in agency and high level briefings by the DCI, the DCI and other public officials.

This function is responsive to the PNSD Priorities XI-4 and XI-5 (DCID 1/3).

National and Regional Analysis - 1. Communist China
and the Eastern Bloc

Description: This function involves production of economic intelligence on the over-all economic posture of Communist China and the five Eastern satellites, including the allocation of resources, economic growth, price structure, government budgets, national accounts, economic organization, economic plans and planning mechanisms, and capabilities to achieve announced goals. This function involves the aggregation of intelligence produced by most of the other components of the Office and presents over-all analyses of the economic situation in these areas. This intelligence is used in the production of National Intelligence Estimates, UN chapters, and the preparation of current intelligence reports and, being of broad interest, serves a great variety of consumers including congressional committees and the President's Business Advisory Council. It is also used extensively in speeches and high level briefings by the DCI, the DCI and other public officials.

This function is responsive to the PRCIC Priorities III-b, III-c, and III-d (DCID 1/3).

ORR/CIA

Production of Intelligence
on
Cost of Military Programs

Description: This function involves production of economic intelligence on the allocation of resources to and the costs of military programs in the Sino-Soviet Bloc, including weapons systems, air defense, equipment and supply, logistics and personnel. This intelligence is used in the preparation of National Intelligence Estimates, briefings and speeches by the Director and other senior officials, and, on occasions, is used in response to requests of the Office of the Secretary of Defense (Comptroller), the Bureau of the Budget, and high-level military planning committees. These cost analyses are used by other components of the CIA in evaluating the impact of such programs on the Soviet economy. This function is responsive to the PNEIC, Priorities 1-4 and III-e (DCID 1/3).

Authority: DCID 3/1, Paragraphs 2-a(3) and 2-b.
Paragraph 2-b states that the costing of Bloc military programs is an overlapping responsibility; however, ORR is the only intelligence organization engaged in research on this subject. CIA Regulation [REDACTED]

~~OSR/CIA~~

Production of Intelligence
on
Ferrous and Non-Ferrous Metals

Description: This function involves the production of economic intelligence on Euro-Soviet Bloc ferrous and non-ferrous mineral resources, their extraction and refinement and their strategic importance to the Bloc. The bulk of this intelligence is produced for DDCI use. It is also used elsewhere in the Economic Research Area in the formulation of long-range growth projections required for contributions to National Intelligence Estimates and for current intelligence support. Thus it is necessary to cover investment policy and trade in metals and the relationships of these industries to other industrial production goals and performances. Increasing effort is being devoted to requests for support from such customers as OPEC, OCP, the President's Committee on World Trade Practices, and members of Congress.

This function is responsive to PNEIO Priorities II-a, II-b, III-a, and III-d.

Authority: DDCI 3/1; [REDACTED]

ORI/CIA

Production of Intelligence
on
Energy Resources

Description: This function involves production of economic intelligence on the energy resources of the Sino-Soviet Bloc, including petroleum, natural gas, solid fuels, electric power and nuclear energy. This includes analysis of present Soviet plans and programs in shifting the existing energy balance between these resources. The resulting intelligence product is used primarily in contributions to the WIE program, to National Intelligence Estimates, and to current intelligence. Research on electric power is making valuable contributions to JAMES's estimates of the Soviet nuclear energy program.

This function is responsive to the PNSC Priorities II-a, II-b, III-a and III-b (DOD 1/3).

OSR/CIA

Production of Intelligence
on
Industrial Activity

Description: This function involves production of economic intelligence on Sino-Soviet Bloc industrial activity in the fields of capital and consumer goods, including metallurgy, transportation construction, mining, agricultural, electrical, electronic and chemical equipment. Also included are the chemicals industry, the construction industry, and civil defense measures. This intelligence is used principally in the preparation of National Intelligence Estimates, HIS contributions, and current intelligence reports; and is incorporated in numerous speeches and briefings given by the DCI and DD/I. This function is responsive to PMEIO Priorities I-a, I-b, I-d, II-c, II-h (DCID 1/3).

Authority: DCID 3/1; [REDACTED] 25X1A

ORR/CIA

Production of Intelligence
on
Population and Manpower

Description: This function involves production of economic intelligence on Sino-Soviet Bloc population, man-power availability and distribution, labor conditions, incentives and other factors affecting the supply, quality and productivity of the Bloc labor forces. This intelligence is used primarily in the preparation of National Intelligence Estimates and in support of current intelligence. Support is provided to such consumers as the military services in connection with estimates of Bloc military manpower, and to the Department of Labor as background for discussions in the ILO. This function is responsive to the PNEIO Priorities II-b, II-c, II-f and II-h (DCID 1/3).

Authority: DCID 3/1; [REDACTED]

OSR/CIA

Production of Economic Intelligence
on
Guided Missiles

Description: This function involves production of intelligence on the economic factors relating to Soviet production, production capabilities, costs and deployment of guided missiles, missile propellants and supporting facilities. A heavy investment in manpower to provide guidance and support of collection activities and to devise and employ original research techniques has been found necessary because of the fragmentary and diverse nature of the available data in this field. The research product of this activity is used primarily by OSIC, OSR, USIA and its member agencies, and provides current intelligence support to ODI and the Director. Support is also provided to the Special Assistant to the Secretary of State for Disarmament and Atomic Energy. This function is responsive to the PNSDO's, priority I-c and I-d (DCID 1/3).

Authority: NSCID 3, Paragraph 7-c. OSR's responsibility in this field is explicitly recognized in the allocations of intelligence production responsibility by OSIC. Moreover, a part of this effort is related to OSR's responsibility for producing "integrated economic intelligence on the Bloc" as specified in DCID 3/1 (1958). Memorandum to DCI jointly submitted by AD/ER and AD/CI, 3 February 1959 and DCI response to AD/ER, 13 February 1959.

Date of Establishment: 1955
